Trainee/Junior

Work Experience

Self-employed

IT Advisor 

Jan. 2010 - present (14 years)
Valencia, Venezuela

I offer a continuous customer support service that includes: administration and maintenance of servers and GNU/Linux workstations; design and management of LAN networks; implementation of security measures and forensic analysis; development of projects with Arduino and Raspberry Pi; registration and administration of Internet domains; implementation and optimization of web hosting services; resolution of computer incidents; and specialized electrical installations for technological equipment.

Almacenes y Depósitos Integrales Portuarios, C.A.

Systems Coordinator 

May. 2007 - Oct. 2009 (2 years, 6 months)
Puerto Cabello, Venezuela

Implementation of process improvements and technological solutions in the port warehouse for the import and export of loose and containerized cargo. Objectives achieved include compliance with customs regulations, increased efficiency and productivity of the personnel in charge of operations, optimization of the accuracy of the inventory of goods and containers, planning of operating resources, reduction of vessel loading and unloading times, guarantee of the physical security of the cargo, timely execution of dispatches in perfect conditions, and satisfaction of the client's demands.

CompuMarket S.A.

Master in e-Commerce Intern 

Mar. 2006 - Jul. 2006 (5 months)
Madrid, España

Acquiring knowledge and skills in key areas such as Internet sales analysis and management, web positioning, content management, online competition analysis and Internet marketing strategies. Demonstrating highly satisfactory performance in all assigned tasks, using specific metrics and tools to improve sales and propose effective strategies. In addition, SEO and web content optimization tests were carried out to improve search engine rankings. In short, the experience provided a solid foundation in the field of digital business.

About ...

With a master's degree in e-Commerce and 14+ years of IT experience, I offer customized solutions to meet my clients' needs.

Passionate about Python and Data Science, I am in constant learning process to handle complex datasets, apply Machine Learning techniques and communicate results effectively.

To keep myself updated, I participate in learning platforms such as Alura Latam, Código Facilito and Microsoft Learn, and in Data Science Discord communities.

In short, as an experienced digital professional with a focus on data analytics, I am ready to add value to your project.

Outstanding Competencies

Knowledge

Fedora Linux SQL VS Code Jupyter Docker GitHub
