About ...

I am a computer engineer with a master's degree in e-Commerce and more than 13 years of experience in the sector. I provide specialized IT consulting and services, offering innovative solutions to meet customer needs. I keep in touch with programs such as ONE - Oracle Next Education, with the purpose of leveraging my training to increase success and bring value to the projects I am involved in. If you require an IT and e-commerce professional, I would be happy to work with you to help you achieve your goals.
